

create a JSON prompt for tamil community people doing a agriculture in 1500 at chennai and prompt should be in SCALE frame work (Subject, composition, Action, Location, Aesthetic)

Absolutely. Here is a **SCALE-framework JSON prompt** designed for generating a historically inspired scene of **Tamil agricultural communities in the Chennai region around 1500 CE**.

JSON

```
{
  "framework": "SCALE",
  "title": "Tamil Agricultural Life in Chennai Region - 1500 CE",

  "S": {
    "subject": {
      "primary": "Tamil agricultural community living in the Chennai region around 1500 C",
      "people": "Tamil farmers, men, women, and children working together",
      "clothing": "Authentic South Indian traditional clothing appropriate to the 15th ce",
      "appearance": "Historically plausible South Indian Tamil features, natural hairstyl",
      "tools": "Traditional wooden ploughs, sickles, baskets, clay pots, farming implemen",
      "animals": "Native Indian cattle and oxen used for ploughing and transporting agric"
    }
  },

  "C": {
    "composition": {
      "framing": "Wide cinematic establishing shot",
      "camera_angle": "Eye-level perspective with a slightly elevated viewpoint",
      "foreground": "Farmers actively working the soil, wooden farming tools and oxen",
      "midground": "Green agricultural fields, irrigation channels, farmers planting and",
      "background": "Traditional Tamil village houses, palm trees, coconut trees, distant",
      "depth": "Strong foreground, middle-ground and background separation with atmospher",
      "visual_balance": "Balanced composition showing both human activity and the surroun",
      "aspect_ratio": "16:9"
    }
  },

  "A": {
    "action": {
      "primary_action": "Tamil farmers cultivating agricultural land using traditional fa",
      "activities": [
        "Farmers ploughing the soil using oxen and wooden ploughs",
        "Women planting and gathering crops",
        "Farmers carrying baskets filled with harvested crops",
        "Children helping with simple agricultural activities",
        "Farmers drawing water through traditional irrigation methods",
        "Community members working cooperatively in the fields"
      ]
    }
  }
}
```

```
    ],
    "environmental_motion": "Gentle movement of crops and palm leaves caused by the coastal breeze",
    "human_emotion": "Natural expressions of concentration, cooperation, happiness and contentment",
  }
},

"L": {
  "location": {
    "region": "Chennai region, Tamil Nadu, South India",
    "historical_period": "Around 1500 CE",
    "setting": "Traditional rural agricultural settlement near the coastal Chennai region",
    "landscape": "Fertile agricultural fields with irrigation channels, palm trees, coconut trees",
    "architecture": "Traditional Tamil village houses made from mud, thatch, timber and brick",
    "cultural_elements": [
      "Traditional Tamil village environment",
      "Small local shrine or temple in the distance",
      "Earthen pots and agricultural storage areas",
      "Traditional irrigation structures",
      "Bullock carts"
    ],
  },
  "historical_accuracy": "Avoid modern buildings, roads, vehicles, electricity poles, etc.",
},

"E": {
  "aesthetic": {
    "style": "Cinematic historical realism",
    "lighting": "Warm early-morning natural sunlight with soft golden rays",
    "color_palette": "Earthy brown, natural green, muted yellow, terracotta and warm golden tones",
    "texture": "Realistic soil, crops, cotton fabric, wood, clay, stone and natural vegetation",
    "atmosphere": "Peaceful, authentic, vibrant rural Tamil Nadu atmosphere",
    "camera": "High-detail cinematic photography, realistic depth of field, subtle atmospheric lighting",
    "quality": "Ultra-realistic, highly detailed, historically immersive, photorealistic",
    "mood": "Community, prosperity, simplicity, tradition and connection with nature"
  }
},

"negative_prompt": [
  "modern buildings",

    "extra fingers",
    "deformed hands",
    "artificial-looking people"
  ],

  "final_prompt": "Create a historically immersive cinematic scene depicting a Tamil agri

```

SCALE breakdown

- **S — Subject:** Tamil farmers, families, oxen, traditional tools and clothing.
- **C — Composition:** Wide 16:9 cinematic establishing shot with foreground, midground and background.
- **A — Action:** Ploughing, planting, harvesting, irrigation and community farming.
- **L — Location:** Chennai-region rural landscape around **1500 CE**.
- **E — Aesthetic:** Historical realism, warm golden light, earthy colors and photorealistic textures.

Historical note: For a stronger historically grounded result, it is better to describe the setting as the **Chennai-region/coastal northern Tamil country around 1500 CE**, rather than implying that the modern city of Chennai existed in its present form at that time.

create a JASON prompt for constructing thanjavur periya kovil by chola's with SCALE frame work (Subject, Composition, Action, Location, Aesthetic)

Absolutely. Here is a detailed **JSON prompt using the SCALE framework** for visualizing the **construction of Thanjavur Periya Kovil (Brihadisvara Temple) during the Chola period**, with emphasis on historical architecture, engineering, craftsmanship, and realism.

JSON

```

{
  "framework": "SCALE",

"final_prompt": "Create an epic, photorealistic cinematic reconstruction of the constru

SCALE structure

SCALE	What it controls
S — Subject	Rajaraja Chola I, architects, sculptors, engineers, workers, elephants and construction materials
C — Composition	Epic wide-angle view emphasizing the enormous scale of the temple
A — Action	Stone cutting, carving, transporting, lifting and assembling massive granite blocks
L — Location	Thanjavur, Chola Empire, early 11th century CE
E — Aesthetic	Photorealistic historical reconstruction, golden-hour lighting and monumental cinematic atmosphere

Tip: For an even more dramatic AI image, the strongest visual concept is to show the **unfinished towering vimana in the background, Rajaraja Chola I in the middle ground, and hundreds of workers + elephants + granite blocks in the foreground**, creating a clear sense of scale and engineering achievement.
